

2022-23 NCAA Banned Substances

NCAA Division I Bylaw 12 and NCAA Divisions II and III Bylaw 14 require that schools provide drug education to all student-athletes. The athletics director or athletics director's designee shall disseminate the list of banned-drug classes to all student-athletes and educate them about products that might contain banned drugs. All student-athletes are to be notified the list may change during the academic year, that updates may be found on the NCAA website (ncaa.org) and informed of the appropriate athletics department procedures for disseminating updates to the list. It is the student-athlete's responsibility to check with the appropriate or designated athletics and/or medical staff before using any substance.

The NCAA bans the following drug classes:

1. Stimulants.
2. Anabolic agents.
3. Alcohol and beta blockers (banned for rifle only).
4. Diuretics and masking agents.
5. Narcotics.
6. Cannabinoids.
7. Peptide hormones, growth factors, related substances and mimetics.
8. Hormone and metabolic modulators.
9. Beta-2 agonists.

Note: Any substance chemically/pharmacologically related to any of the classes listed above and with no current approval by any governmental regulatory health authority for human therapeutic use (e.g., drugs under pre-clinical or clinical development or discontinued, designer drugs, substances approved only for veterinary use) is also banned. All drugs within the banned-drug class shall be considered to be banned regardless of whether they have been specifically identified. Examples of substances under each class can be found at ncaa.org/drugtesting. There is no complete list of banned substances.

Substances and Methods Subject to Restrictions:

1. Blood and gene doping.
2. Local anesthetics (permitted under some conditions).
3. Manipulation of urine samples.
4. Tampering of urine samples.
5. Beta-2 agonists (permitted only by inhalation with prescription).

NCAA Nutritional/Dietary Supplements:

Before using any nutritional/dietary supplement product, a student-athlete should review the product and its label with the appropriate athletics department and/or medical staff.

1. Many nutritional/dietary supplements are contaminated with banned substances not listed on the label.
2. Nutritional/dietary supplements, including vitamins and minerals, are not well-regulated and may cause a positive drug test.
3. Student-athletes have tested positive and lost their eligibility using nutritional/dietary supplements.
4. Any product containing a nutritional/dietary supplement ingredient is taken at your own risk.

As part of its responsibility to provide education about banned substances, athletics department staff should consider providing information about supplement use and the importance of having nutritional/dietary products evaluate by qualified staff members before consuming. The NCAA has identified Drug Free Sport AXIS™ (AXIS) as the service designated to facilitate student-athlete and institutional review of label ingredients in medications and nutritional/dietary supplements. Contact AXIS at 816-474-7321 or dfsaxis.com (password ncaa1, ncaa2 or ncaa3).

THERE IS NO COMPLETE LIST OF BANNED SUBSTANCES. DO NOT RELY ON THIS LIST AS EXHAUSTIVE OR TO CONFIRM OR RULE OUT ANY LABEL INGREDIENT THAT MAY CONTAIN A POTENTIAL BANNED SUBSTANCE.

Many nutritional/dietary supplements are contaminated with banned substances not listed on the label. It is the student-athlete's responsibility to check with the appropriate or designated athletics and/or medical staff before using any substance.
